Location: New York, NY

Summary

Full-stack developer with a strong interest in AI and automation. 2 years of experience integrating APIs, building internal tools, and recently transitioned into the AI space. Eager to grow in a role that bridges business and AI.

Skills

- JavaScript, Python, Node.js
- REST APIs, Zapier, Airtable
- Exposure to OpenAI API and prompt design
- Some experience with n8n (1-2 workflows)
- MongoDB, MySQL, Express.js

Experience

Software Engineer – Horizon Web Tools
Jul 2021 – Present

- Maintained and improved internal tooling with integrations to CRMs and Notion via APIs.
- Used n8n to build basic automations for the marketing team.

AI Bootcamp Trainee – CoLab
Mar 2023 – Jul 2023

- Completed AI systems course covering LLM APIs, prompt tuning, and Pinecone basics.

Freelance Web Developer
2019 – 2021

- Built small business sites and basic automation setups using Airtable and Integromat.
